SUBJECT Surveillance

1440 - Arrived at SCP, Paterson Plank Road, Carlstadt, NJ. Trucking personnel (PA Peretti Freight) was on-site.

Inspection of facility revealed the following deficiencies:

1. Drums of material removed from tank trailer are rusting and stored in approx. 1' of ponded water.
2. Tank T-105 is leaking brown liquid onto soil. The side of this tank is corroding and causing material to escape.
3. Blue tank trailer #14 is leaking a black liquid onto the soil from a hole in a seam of the tank. A resulting spill approx. 4' x 3' has resulted.

Pat Peretti Freight operates three diesel fuel storage tanks in tank trailers. Spills of diesel fuel surrounded each trailer. One loaded Peretti truck containing ski boats was on-site. This trailer was locked and sealed, therefore, I could not check inside of it. A shipping document was reviewed for this shipment.
